MEDICAL DEPARTMENT.

The institution is under the general supervision of S. M. Davis, M. D., Professor of the Theory and Practice of Medicine in Central Medical Colleges, and Geo. W. Davis, M. D., formerly of Dansville, N. Y., the resident physician, and is permanently associated with the before mentioned gentleman as counsel, and associate of the medical board of control. And the friends of the establishment deem it anatter of felicitation that the services of Miss Mary M. Taylor, a lady of high medical attainments, who has attended two courses of lectures in the Central Medical College, haye been secured, and that female patients can at any time avail themsolves of her invaluable aid and counsel.

The steward's department is under the control of a gentleman eminently qualified for that position; and unwearied pains will be taken to have every thing appertaining to the establishment arranged on a plan, and conducted in a way, to ensure the comfort, and promote the health and happiness of all who may wish to avail themselves of its benefits. Baths of all descriptions, adapted to the cure of the various forms of diseases, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has every where repudiated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have imperatively demanded "Reform." A return from a wide and fatal departure from the simplicity of Nature's laws is called for, alike by a rational love of happtuses and the deplorable exigencies of our condition. COLD SPRING WATER CURE.

This NEW AND SPLENDID ESTABLISHMENT for the scientific restment of the various diseases with which the human system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses rims from the steamboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and miscrices of the Messrs, Hodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embracing joints of view, from which may be taken in at a glance the broad expanse of Lake Erie, the Niagara flowing majestically towards the Falls, extensive forests, and the "Queen City of the Lakes," with its moving panorama of steamboats and ceaseless enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently eracted at a cost of about seven thousand dollars, has been fitted up in a neat and elegant style, at considerable extra expense, and is sufficiently capacious to accommodate seventy-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and heatithing symmatic exercises.

ELASTICE UNIVERSAL TOUCH.

WISE & BROTHER, Manufacturers of Bondors, Grand, and Square Pianos, request those who would be assured of a first class Plano, that ladies can perform on with the greatest possible advantage—one that the touch can be instantly adjusted to the exact strength of the fingers and movement of music, one that will stand in concert tune, one that the tone will not become shrill and grating, that is chaste of style and elegantly made up of straight and regular curve lines, that will last an age—to give them a call. The ancient standing of the Bailmore Factory, and liberal patronage of citizens and others of the first order of artisfic taste and selence, conceded at once the most critical, have been fully anticipated. Their recently finished Grand Piano, minutely reviewed by the most accomplished civil engineers and ansater artists, has been denominated truly a Grand Piano; also, that their late Boudoir, for style, power, and compass of tone, is not surpassed, if equalled, in the world. Friends and customers, please stop in and examine for yourselves.

Letter from the Hon. Henry Clay.

Ashland, 20th July, 1849.

Dear Sir: I wish to express to you the gratification I derived on receiving the July number of the Merchants' Magazine and Commercial Review, from yiewing your portrait in the beginning, and from reading your address to your friends at the end of it. When we feel under obligations to those who have contributed to our information and amusement, we are naturally desirous to possess all the knowledge of them, of their appearance, of the features of their countenance, and of the character and habits of their mind, which we can acquire. You have placed your numerous readers (at least you have me, if I may not speak for them) under those obligations; and the number of your valuable work now before me, in some degree, satisfies the desire to which I have alluded.

I have become quite familiar with the Magazine and Review, and have no hesitation in expressing my humble opinion that it is eminently entitled to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, highly neeful not only to the merchant, but to the statesman, to the cultivator of the earth, to the manufacturer, to the mariner, in abort, to all classes of the business and reading community.

Entertaining this opinion, I am glad that it has been, and hope that it may continue to be, liberally patronized.

Offering you cordial assurances of my esteem and regard, I am truly your friend and obedient servant, Freeman Hunt, esq.

Entertaining this opinion, Hun. Millard Fillmore.

"I have read it (Merchants' Magazine) with a good deal of attention, and have no hesitation in saying that I think it one of the most valuable periodicals that was ever published. To the merchant it seems quite indispensable, and to the statesman and man of general information almost equally desirable. It is a grand repository of useful facts and information, which can be found now where so well digested and so accessi Sth. A CIVIL ENGINEER DEPARTMENT—In which are taught Arithmetic, (mental and written,) Algebra, (mental and written,) Commetry, Trigonometry, Surveying, with the use of instruments in the field, Fractical Engineering, Architecture, Perspective, Draughting, and Topography.

6th. A Tricher's Department—The course of study will consist of a judicious selection of subjects from the other departments, including all the branches pursued in our commou schools. Practical Lectures will also be given on School Teaching, both as a science and as an art.

Pupils will not only thus receive the fullest instruction relative to the best and most popular methods of teaching, but they will also have opportunities of exemplifying them, by hearing recitations in the lower departments of the Institution.

7th. A Department of Modern Languages—In which students who wish to take a thorough course can have an opportunity of doing so; while others, whose object may be to acquire sufficient knowledge to translate with facility, and to pronounce with tolerable corroctness, in as short a time as possible, are also provided for.

Rewark Academy.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to place it upon a new and improved foundation, and to endow it with advantages possessed by few similar into the country. The Academy, heretofire merged in the College, and of content places and the control of the same powermment, now enjoys the privilege of a separate establishment, without losing those which result from its relation to the College proper.

A large and depart delifice, with all the necessary fixtures of a complete boarding establishment, his board of the control o where so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

Letter from the Hon. Thomas H. Benton.

Washington Crit, April 20, 1849.

Mr. Freeman Hunt.—Sir: I ove you many thanks for the opportunities I have had to read the Merchants' Magasine, and have found it in reality to be a magazine, and that well replenished, of all the useful matter which the little would imply, and presented with a fullmass and clearness which delights while it instructs. It is, in fact, a merchants' magazine in the large acceptation of the term—merchants who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into daily requisition. But it is not the great merchant only, but the one of more modest, but, nevertheless, of most useful operations—the merchant of the interior also—who will find this magazine to abound with the information the pursuit of his business and the elevation of the mercantile character requires. Nor is its utility at all confined to merchants, but extends to the legislator and diplomatist, and to all who are charged with managing the affairs of the action. For myself, I have found it most useful to me in my senatorial labors, and have been in the habit for many years of carefully consulting it.

Very respectfully, sir, your obedient servant,

hose of the College.

Rev. MATTHEW MEIGS, A. M.,

President of Delaware College.

An extended notice of the unsurpassed conveniences of this House is deemed superfluous, as the numerous improvements which have been made cannot be properly given in an advertisement. Suffice it to say that no expense has been spared to render any apartment perfect.

The furniture was made expressly to order, regardless of cost, and certain portions of it, especially the Drawing rooms, will be found to be of the most beautiful and tasteful manufacture. The Dining-rooms are capacious, and the hours for meals will be so arranged as to suit the convenience of the early and late.

Austin's Magic Freezer,

Through in six minutes. For the preparation of Ice Creams, Water Ices, &c.—Patented September 19, 1848.

The distinguising merits of this Apparatus are—

1st. The astonishing rapidity of the process, surpassing belief—hence the name.

24. The Cream-during the progress of freezing becomes charged with atmospheric air, by which it nearly doubles in bulk, and obtains that peculiar smoothness, lightness, and delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.

3d. It does not require a tenth part of the labor that the common Freezer does.

4th. It does its work better, producing a better article, in every respect, than by any other mode.

5th. There is a considerable saving in ice, as the tub needs no replenishing during the operation.

The annexed testimonial from the Proprietor of the Eutaw House will put to rest all doubt.

"Having witnessed the process of freezing Ice Cream in Austin's Magic Freezer, two quarts of Cream having been frozen in the incredible short time of six minutes, I cheerfully recommend it to the public."

By the above schedule it will be perceived that passen gers going South, leaving New York at 4'½ p. m., Philadelphia at 10 p. m., or Baltimore at 6 p. m., reach Charleston, S. C., in two days from Baltimore, being twenty-four hours in advance of any other line.

Breakfast on board the steamboat; passing down the Petomac, in view of Mount Vernon, by daylight.

Passengers arriving in Baltimore by the morning line from Philadelphia, gain nothing by going on immediately by the Bay Line, and may as well remain over in Baltimore until 6 a. m., or go on to Washington at 5 p. m., and remain until 9 a. m., the next morning, as they are obliged to lie over in Petorsburg, if they arrive there earlier than the Great Mail Line of the next morning, and are subjected to all the uncertainties and discomforts of a night out the Bay, instead of passing an agreeable one in Baltimore or Washington, without arriving any sconer, if as soon, at the end of their journey.

Passengers going to Washington by the train of 10 p.m., are taken, if they desire it, by the Company's Omnibus, at once, without charge, from the Washington depot to the Potomic steamboat, where they lodge, free of charge, and may lay over, (if they desire to do so.) with their through tickets, for a few days, at the following places, viz: Washington, Richmond, Petersburg, and Weldon.

Omnibuses are provided by the companies on this Line at Washington, Richmond, and Petersburg, by which passengers and their bagging are conveyed between the depots in those places, free of all expense.

BLACKWOOD'S MAGAZINE

BRITISH QUARTERLY REVIEWS.

low prises at which they are offered to subscribers. The following is their list, vir:

The London Quarterly Review,
The Edinbergh Review,
The Robinsersh Review,
The Robinsersh Review,
The North Bertish Review,
The Westminster Review, and
Blackwood's Edinbergh Magazing.

In these periodicals are contained the views; moderately though clearly and firmly expressed, of the three greatest parties in England—Tory, Whig, and Radical; "Rickwood" and the "London Quarterly" are Tory, the "Elinburgh Review" Whig, and the "Westminster Review" biberal. The "North British Review" owes its establishment to the last great ecclesiastical movement in Scotland, and is not ultra in its views on any one of the grand departments of human knowledge. It was originally edited by his son-in-law, Dr. Hanna, associated with Sir David Brewster. Its literary character is of the very highest order. The "Westminster," though reprinted under that title only, is published in England under the title of the "Foreign Quarterly and Westminster," it being in fact a union of the two Reviews formerly published and reprinted under separate titles. It has, therefore, the advantage, by this combination, of uniting in one work the best features of both, as heretofore issued.

The above Periodicals are reprinted in New York, immediately on their arrival by the British steamers, in a beautiful clear type, on fine white paper, and are faithful copies of the originals—Blackwood's Magazine being an exact fac simile of the Edinburgh edition.

LEVERETT'S LATIN LEVICON

ENLARGED AND IMPROVED, compiled chiefly from the Magnum Totius Latinitatis Lexicon at Facciolatia and Forcellini, and the German works of Schelles and Lue-nemann, embracing, also, the classical distinctions of words, and the Etymological Index from Freund's Lexi-con.

nemann, embracing, also, the classical instinctions of words, and the Etymological Index from Freund's Lexicon.

The present edition of this standard and favorite Latin Lexicon has been much improved by the transfer to its columns of the classical distinctions of Latin words, as given in the Lexicon of Dr. War. Freund, of Germany, and translated by Riddle. The classical degree of each word is indicated by a figure; for example, a word without a figure is fully clussical and Ciceronian; with the figures 1, 2, and 3, words are classical only in the first, second, &c., degrees; and this distinction the student perceives at a glance. The Etymological Index, also from Freund's Lexicon, has been incorporated into the present edition of Leverett, and will be found a valuable acquisition. While transferring these notes and marks, catalogues were carefully kept of the words found in each lexicon, which were not found in the other. On comparing these catalogues, it was found that the value and importance of the additional words found in Leverett, so far as a knowledge of the Latin language is concerned, very far exceeds that of those found in Riddle's Freund. The extensive use of Leverett's Lexicon in all parts of the country, and the preference which has been universally given to it over all similar works, render its recommendation superflueur; but attention to this new edition is respectfully invited, as being still more worthy than its predecessors of the distinguished favor which the work has hitherto received.

This well known and extensive astablishment invites Merchants, Manufacturers, and Bankers, to an investigation of its system, and gratuitous test of its records of the standing and responsibility of traders in the U. States.

Our increased patronage has enabled us, during the past year, to open offices in Cincinnati, Louisville, St. Louis.

Gur increased patronage has enabled us, during the past year, to open offices in Cincinnati, Louisville, St. Louis, and New Orleans; these, in connection with our long es-tablished offices in Boston, New York, and Baltimore, enable us to offer facilities and advantages which time and experience alone could accumulate, and which we believe are unequalled.

experience alone could accumulate, and which we believe are unequalled.

We are prepared to make collections in any of the States, Territories, Canada, England, Ireland, Scotland, France, Germany, and in any commercial port of the world, and will pay particular attention to old and doubtful debts, in the collection of which class we have extraordinary facilities, and have been unusually successful.

Having full lists and reports of nearly all the Attorneys in the United States, we are at all times prepared to furnish you, gratuitously, the names of good and responsible lawyers in any part of the United States and Canadaa.

Connected with our Agency is a Commissioner for nearly all the States, who is enabled to afford every facility and legal form for preparing accounts, &c., for immediate use, thereby avoiding a delay often fatal to the collection of a debt.

President of Amherst College, and Professor of Geology, Massachusetts.

Amberst College, Dec. 25, 1848.

Mr. Robert Scars—Dear Sir: I have looked over the entire series of your valuable publications with much interest and profit; and am quite surprised at the amount of literary labor you have performed, and the research it must have cost you to obtain so many fine illustrations, while you have an active superintendence of an extensive business. I am also gratified at the decidedly moral and religious influence which your books will exert, and cannot but hope that they will do much to counterset the effects of that light and immoral literature which deluges the land, and like the frogs of Egypt, comes up even to the kneading troughs of our kitchens. May you live long to follow your plans.

Respectfully and sincerely, your obliged servant, EDWARD HITCHCOCK:
